

BYTEC I THE NEW KID ON THE BLOCK!

BYTEC II FAST AND FUN

New kid on the block!

The new CI is the perfect size for post Optimist sailors

It's mini in a massive way! Performance, Power and control...

We don't expect children to ride adult bikes when they can't touch the ground, so why do we expect them to sail adult boats when they can't keep it down?

Guiding the younger generation to success

The CI is all about enabling younger sailors to develop their skills whilst remaining fun, safe and manageable

CI= more fun

Affordable, durable and cool!

With a carbon fibre rig, mylar sail and quality build and fittings it costs less than you might think

Carbon Rig = More value for money

We believe that our newly designed carbon rig is the most durable and versatile carbon rig ever made. The rigs are fully interchangeable so going from the CI to the CII is just a matter of changing the bottom section and sail.

A foundation for the future

The Byte CII is an international ISAF class with national and international championships, used at the Youth Olympic Games as a foundation boat for future Olympians!

A Global Player

Sailed around the world and built by seven of the leading dinghy manufacturers around the globe. We have it covered!

Affordable, durable and cool!

With a carbon fibre rig, mylar sail and top quality build and fittings, it costs less than you might think.

Carbon Rig = More value for money

We believe that our newly designed carbon rig is the most durable and versatile carbon rig ever made. The rigs are fully interchangeable so going from the CI to the CII is just a matter of changing the bottom section and sail.
